Institute of
Tropical Medicine
Antwerp

Practical?
Participation is free
Accreditation is being requested
Final programme & registration are upcoming

Who should attend?
Care providers, community organisations,
policy makers and researchers in the domain
of HIV and PrEP

CONCLUDING SYMPOSIUM PROMISE PROJECT

In the past 4 years, the PROMISE project collected valuable scientific evidence on the implementation of PrEP in Belgium. Who is (not) being reached with PrEP? What are the needs and preferences of PrEP users? What is the best way to deliver PrEP care? What about groups with difficult access to PrEP, such as sex workers and migrants?

PROGRAMME: FROM RESEARCH RESULTS TO PRACTICE AND POLICY

In this symposium we will present the main results of PROMISE, as well as recommendations for practice and policy. In interactive workshops, we will also actively engage with good practices and lessons learned.
